WORK EXPERIENCE

Technical Lead
Wipro Limited, *Pune*
27-SEP-2018 to Present

Responsibilities:
➤ Took up the responsibility of the entire Project.
➤ Carefully analyse the project and rectify the errors found in the process.
➤ Coordinate with the TPA/BA/SA on current programming tasks, project risk and Planning mitigation action at project level.
➤ Assigned the task to the team members as per their skills and helped to team on their technical issues.
➤ Motivate and encourage team to give their best, especially during the time when they are pressurized with high targets.
➤ Involved in build deployment on cert and production environment.
➤ Continuously learn and improve the skills.

PROJECT PROFILE
Client: HSBC Software Development
Project: *Banking 2.0*

Descriptions:
Development of Process APIs (Microservices) which receive requests from dynamic platforms (Web/Mobile) and are responsible for transforming incoming requests into System API requests which can be one or multiple based on requirements.
The requests then reach the backend and retrieves or posts required response from backend to System API which in turn brings it back to the Process API.
Process API then applies transformation/business logic and send data back to the requester.
